AI Director and Architect
Technical Project Management
Business Analyst and Forward Deployed Engineer

Professional summary

AI director and architect for agentic systems, technical operations, and delivery planning, with 10+ years shipping fintech products. The work is ordered as AI leadership, then project management, then business analysis and forward-deployed delivery, with software engineering as the execution layer underneath. Co-founded Garlican Tech and directed Investtab.com from 0 to 30,000+ active users. Holds an M.S. in Statistics and passed SOA/CAS exams P, FM, MFE, and MLC.

Keywords

AI Director and Architect	Agentic AI	LLM / MCP / ACP
Prompt Engineering and AI Copilot	Technical Project Management	Business Analyst
Forward Deployed Engineer	Full Stack	AI Engineer

AI and architecture	Agentic AI · autonomous agents · ACP · MCP · LLM tool calling · prompt engineering · AI copilot · AI architecture
Leadership and delivery	Executive leadership · roadmap planning · SDLC · Agile · Scrum · UAT · budget allocation · cross-functional management
Analysis and deployment	Business analysis · BRD · FSD · ERD · schema design · stakeholder workshops · runbooks · onsite launch · forward deployment
Languages	Python · Node.js · FastAPI · Next.js · React · React Native · TypeScript · PHP · HTML5 · Linux
Platforms and data	WebSockets · REST APIs · AWS · SQL · MySQL · MongoDB · NoSQL
Markets	TradingView · MultiCharts · broker systems · statistical modeling · algorithmic backtesting · real-time market data

Professional experience

Garlican Tech Limited • Hong Kong

Nov 2019 - Present

Executive Director, Technical Co-Founder and Lead AI

- Directed AI architecture for agentic workflows, including ACP and MCP servers that automate multi-agent signal validation and market sentiment analysis inside LLM networks.
- Led product and project planning across the full SDLC, including the platform roadmap, client requirement gathering, and technical sales for B2B institutional clients.
- Architected a B2B quant-trading ecosystem that lets non-technical traders compose, backtest, and execute algorithmic strategies through a zero-code visual builder.
- Used Cursor for copilot development of the trading platform and tools proof of concept.
- Forward-deployed the platform with institutional clients, translating operating needs into delivery plans and implementation support.
- Directed the engineering execution layer: Next.js and React UI architecture, Python microservices for order routing and risk checks, and API and WebSocket integrations with TradingView, MultiCharts, and Broker Supplied Systems.

Investtab.com • Hong Kong

May 2015 - Nov 2019

Operations Director and Systems Product Manager

- Directed technical operations, product planning, and expansion, scaling the financial analysis and real-time stock watchlist platform from zero to 30,000+ active retail investors.
- Planned cross-functional roadmaps, budget allocation, and APAC B2B/B2C channel expansion.
- Partnered with financial KOLs, including MoneyTab, to turn market commentary and stock analysis methods into platform features.
- Architected high-concurrency real-time stock data feeds, dynamic charts, and watchlist alerts across web and mobile (React, React Native, Node.js, Python) on SQL and NoSQL schemas.

KPMG China • Hong Kong

Dec 2015 - Apr 2016

Assistant Manager, IT Advisory and Business Analysis

- Led business analysis between enterprise stakeholders and engineering teams, translating financial and operational logic into technical specifications.
- Managed delivery governance, UAT schedules, and production deployment for major corporate clients.

GSMA Limited • Hong Kong

Oct 2014 - Jul 2015

Business Analyst, Customer Care and Registration, Event Technology

- GSMA hosts Mobile World Congress in Barcelona and Shanghai, welcoming 100,000+ industry executives.
- Managed the delivery lifecycle for high-concurrency event registration and customer care platforms from scoping through live launch.
- Forward-deployed onsite at MWC Barcelona and Shanghai, providing high-availability infrastructure support during the events.
- Ran discovery workshops with internal business units and global vendors, then authored runbooks, training, and UAT for multi-tier registration platforms.
- Designed registration analytics portals and executive dashboards.

C2Square International LTD • Hong Kong

Feb 2014 - May 2014

Business Analyst and iOS Developer

- Authored ERD diagrams, I/O specifications, and mobile proof-of-concept applications with SQL backends.

nxTomo Games LTD • Hong Kong

Feb 2013 - Feb 2014

Business Analyst

- Designed database schemas on Linux, SQL, and MongoDB, and built real-time PHP analytics dashboards for executive reporting.

Century Beyond Intl Ltd • San Jose, CA, USA

May 2010 - Nov 2012

Programmer and Business Analyst

- Turned client business models into working web and mobile prototypes (HTML5, PHP, SQL).

Education

Master of Science (M.S.) in Statistics

West Virginia University, USA • Aug 2004 - May 2009

Bachelor of Arts (B.A.) in Economics and Statistics (Double Major)

University of California, Davis, USA • Sept 2001 - Dec 2003

SOA/CAS exams passed: P (Probability), FM (Financial Mathematics), MFE (Models for Financial Economics), MLC (Models for Life Contingencies). VEE validation in Applied Statistics, Corporate Finance, and Economics.
