Technical Product Manager

Full-Stack Developer

Business Analyst

Professional summary

AI-driven technical product manager, full-stack developer, and business analyst with 10+ years of end-to-end software delivery, specializing in fintech systems, low-code B2B quant platforms, and agentic AI architecture. Combines hands-on full-stack programming (Next.js, React, Python, WebSockets, APIs) with an M.S. in Statistics and an actuarial science background to bridge quantitative risk models with scalable products. Scaled platforms from 0 to 30,000+ active users, integrated TradingView and MultiCharts, and translated business requirements into engineering specs.

Keywords

Technical Product Manager	Full-Stack Developer	Business Analyst
Agentic AI	LLM / MCP / ACP	Prompt Engineering and AI Copilot
Python	Fintech	Quant Trading
Next.js and React	Statistical Modeling	SDLC and UAT

Core competencies and technical stack

AI and architecture	Agentic AI architectures · autonomous agent orchestration · ACP · MCP servers · LLM tool calling · dynamic prompt engineering · AI copilot
Leadership and delivery	Executive leadership · end-to-end SDLC · Agile · Scrum · UAT · roadmap planning · cross-functional management · APAC channel expansion
Analysis and deployment	Business analysis · BRD · FSD · ERD · schema design · stakeholder workshops · runbooks · onsite launch · QA
Languages	Python · Node.js · FastAPI · Next.js · React · React Native · TypeScript · PHP · HTML5
Platforms and data	WebSockets · REST APIs · AWS · SQL · MySQL · MongoDB · NoSQL · Linux · R · SAS
Markets	TradingView · MultiCharts · broker supplied systems · zero-code strategy builders · algorithmic backtesting · real-time market data

Professional experience

Garlican Tech Limited · Hong Kong

Nov 2019 - Present

Executive Director, Technical Co-Founder and Lead AI PM

- Co-founded and architected a B2B quant-trading ecosystem that lets non-technical traders compose, backtest, and execute algorithmic trading strategies with a zero-code visual builder.
- Spearheaded API and WebSocket integrations with TradingView, MultiCharts, and Broker Supplied Systems, including sub-second execution logic and signal routing.
- Architected custom ACP and MCP servers to automate multi-agent signal validation and market sentiment analysis within LLM networks.
- Led frontend UI architecture in Next.js and React, and built asynchronous Python microservices for real-time order routing, risk checks, and streaming financial telemetry.
- Managed the full SDLC, technical sales engineering for B2B institutional clients, client requirement gathering, and platform roadmap planning.
- Used Cursor for copilot development of the trading platform and tools proof of concept.

Investtab.com • Hong Kong

May 2015 - Nov 2019

Operations Director and Systems Product Manager

- Directed system architecture, technical operations, and product expansion, scaling the financial analysis and real-time stock watchlist platform from zero to 30,000+ active retail investors.
- Partnered with financial KOLs, including MoneyTab, to turn market commentary and stock analysis methods into platform features and real-time market tools.
- Architected high-concurrency real-time stock market data feeds, dynamic charts, and automated watchlist alerts across web and mobile (React, React Native, Node.js, Python).
- Oversaw technical roadmaps, budget allocation, SQL and NoSQL schemas, and B2B/B2C channel expansion across APAC.

KPMG China • Hong Kong

Dec 2015 - Apr 2016

Assistant Manager, IT Advisory and Business Analysis

- Interfaced between enterprise client stakeholders and developer teams, translating financial and operational business logic into technical specifications.
- Managed software delivery lifecycles, structured UAT schedules, and production deployment for major corporate clients.

GSMA Limited • Hong Kong

Oct 2014 - Jul 2015

Business Analyst, Customer Care and Registration, Event Technology

- GSMA hosts Mobile World Congress in Barcelona and Shanghai, welcoming 100,000+ industry executives.
- Managed full technical delivery lifecycles for high-concurrency event registration and customer care platforms from scoping through live launch.
- Coordinated discovery workshops with internal business units and global vendors.
- Authored system documentation and runbooks, and led technical training and UAT across multi-tier registration platforms.
- Provided infrastructure support onsite at MWC Barcelona and Shanghai, and designed registration analytics portals and executive dashboards.

C2Square International LTD • Hong Kong

Feb 2014 - May 2014

Business Analyst and iOS Developer

- Authored ERD diagrams, I/O specifications, and mobile app proofs of concept with SQL backends.

nxTomo Games LTD • Hong Kong

Feb 2013 - Feb 2014

Business Analyst

- Designed database schemas on Linux, SQL, and MongoDB, and built real-time PHP analytics dashboards for executive reporting.

Century Beyond Intl Ltd • San Jose, CA, USA

May 2010 - Nov 2012

Programmer and Business Analyst

- Developed custom web and mobile applications in HTML5, PHP, and SQL, and turned client business models into working software prototypes.

Education

Master of Science (M.S.) in Statistics

West Virginia University, USA • Aug 2004 - May 2009

Bachelor of Arts (B.A.) in Economics and Statistics (Double Major)

University of California, Davis, USA • Sept 2001 - Dec 2003

SOA/CAS exams passed: P (Probability), FM (Financial Mathematics), MFE (Models for Financial Economics), MLC (Models for Life Contingencies). VEE validation in Applied Statistics, Corporate Finance, and Economics.
